### **DETAILED ACTION**

1. This is a response to the Request for Continued Examination (RCE) filed on 1/3/06.

### ***REASONS FOR ALLOWANCE***

2. Claims 1-31 are allowed.

The following is an examiner's statement of reasons for allowance:

There is no teaching or suggestion in the prior art to:

"a control circuit connected to the plurality of first and second write lines to control a dependence on temperature of a pulse width of at least one of the first write current and second write current" as claimed in the independent claim 1.

3. The following prior art, which is considered pertinent to applicant's disclosure although not relied upon, includes:

Perner (US. Pat. No. 6,865,104) or Ho et al. (Pub. No. US 2005/0128793) disclose write current MRAM similar to that of the present application, but fail to disclose the claimed limitations as described above.

The Japanese references JP 2003257175 and JP 2003173672 and JP2003109374 disclose similar memory device that include a current generator that

generates a variable write current based on the temperature. However, none of these disclose a control circuit that control the dependency on temperature of a pulse width of at least one of a first write current and a second write current. It is noted that all the three references noted above detect the amplitude of the temperature and then generate a write current based on the temperature sensed, but none of the deal with the pulse width of the first write current and the second write current as claimed in claim 1 of the instant application.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nam T. Nguyen whose telephone number is (571) 272-1878. The examiner can normally be reached on 8 am to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
